34-0006 **Bridge No: Component:** OBG

Summary of Items Observed:

On this day Caltrans OSM Quality Assurance (QA) Inspector Erik Prue was present during the times noted above for observations relative to the fabrication of the SAS Superstructure being performed by Zhenhua Port Machinery Company (ZPMC) at Changxing Island in Shanghai, China. QA Inspector observed and/or found the following:

Segment 4BW: QA Inspector received notification that segment 2AE side plates, bottom plates, deck panels, and edge plates welds and base material on outside of segment had been visually inspected by ABF and ZPMC QC personnel after blast and are ready for QA visual verification. QA Inspector performed visual verification on QC inspector inspection. QA Inspector noted indications marked for repair by ABF QC Inspectors and concur with QC findings. QA Inspector marked three (3) indications not marked by QC Inspection for repair by grinding. QA Inspector marked two (2) areas for repair by welding. Areas marked for weld repair that are unacceptable to AWS D1.5 (02) section 6.26 have been taped and documented for tracking after segment painting. QA Inspector along with ZPMC and ABF QC personnel verified areas marked for repair by grinding on outside of segment have been repaired and appear to be in compliance with the acceptance requirements of AWS D1.5 (02) and the contract documents.

Unless otherwise noted, all work observed on this date appears to be in general compliance with the applicable contract documents.

Summary of Conversations:

No significant conversations this day.
